Automatic Egg Stamper Heads

Egg Stamping Equipment

Manual Egg Stamping

The Manual egg stamp is designed for a simple stamping application on layer as well as breeder eggs. It houses an integral refillable ink tank . Stamp easy, fast and safe directly on 30 eggs in trays. Refilling of Stamp can be done after every 15,000 prints

Automatic Egg Stamping

The Automatic egg stamper equipment is designed for production facilities as a conveyorized system for directly printing on 30 egg trays continuously for large production volumes. 6 Stamping heads stamp the eggs as the tray indexes in 5 steps on the stamping conveyor.

Different programs are provided for 6 egg / 12 egg tray packs.

Flexible Curved Technology

The Egg stamp head is designed in a way that there is neither the need of a separate ink pad, nor the need to touch the egg during stamping. It has an inbuilt reservoir to store ink. Also Credence proprietary stamp design of flexible curve, which actually takes the shape of egg while stamping, which enables in soft stamping without damaging the eggs.
