For eye drop vaccination treatment of day old poultry chicks

All Electric
No Compressed Air

CREDENCE
INDOMECHANICS
Intelligent Machines

Droplet Stay Function (droplet does not fall)

Confimation by Checking

Credence Biospray Vaccinator

How it Works

- Whenever the operator presses the foot switch or if the sensor sensed the Device will deliver a drop and keep it suspended.
Note : The drop will not fall and will keep suspending on the nozzle tube.
- When the operator positions the eye of the chick near the nozzle the droplet is absorbed in the eye of the chick.
- Also the count will go up by 1 value.
- The Vaccine temperature is maintained at cool temp. with the help of gel filled jackets.

Credence Eye Dropper Vaccinator
